EDUCATION

Cornell University, College of Engineering **Ithaca, NY**
Bachelor of Science in Computer Science • Minor in Film and Game Design *Expected May 2026*
- GPA: 3.975/4.0, Dean's List, Fall '22 - Spring '25

Master of Engineering in Computer Science *Expected December 2026*

Relevant Courses: Machine Learning; Deep Learning; Probability and Stats; Operating Systems; Computational Linguistics; Data Science; Computer Vision*; Systems for Large-Scale ML*; Computer Graphics* (**Fall 2025*)

WORK EXPERIENCE

Amazon - Basket Building Team **Denver, CO**
Software Development Engineering Intern *June 2025 - August 2025*
- Architected an internal model context protocol (MCP) server to automate and streamline support ticket resolution for third-party seller issues using TypeScript in Amazon's LLM framework (Claude 3.7/4 Sonnet and Opus)
- Prompt-engineered a workflow that executes MCP tools, validates outputs, and publishes customer-facing responses
- Achieved 58% autonomous ticket resolution rate on real seller support tickets received by full-time engineers, significantly accelerating on-call response rate and reducing average on-call hours by around a fourth

Wells Fargo Sophomore Discovery Fellowship **Charlotte, NC**
Technology Analyst *June 2024 - August 2024*
- Shadowed Enterprise Risk Program Reporting team in using Risk Data Services to centralize risk data integration
- Worked with lead software engineers on the DevOps team to master application onboarding, entitlement granting, repository creation processes, system integration testing, and user acceptance testing processes
- Integrated frontend and backend for full stack employee-centered app on Web, iOS, and Android that allows for staff to engage in physical activity competitions using React JS, Typescript, CSS, SQL, and Progressive Web App

Combat Robotics @ Cornell **Ithaca, NY**
Marketing Subteam Lead *August 2023 - August 2024*
- Organized a 2-semester website revamp from vanilla HTML to ReactJS framework while mentoring 7 lower-classmen on Git usage, code documentation, and professional coding practices
- Recruited and onboarded 10 new subteam members with 6 2-hour training sessions in team operations
- Led a 1-month crowdfunding campaign, securing $9,172 through progress management and outreach task delegation

PROJECT EXPERIENCE

'Show, Attend and Tell' Paper Reimplementation **March 2025 - May 2025**
- Recreated an image captioning model introduced in Xu et al. (2015) with 65% accuracy within 2% of the original paper
- Trained LSTM RNN models with pretrained CNN outputs on the Flickr8k dataset using PyTorch in Google Colab
- Developed soft attention to dynamically pinpoint regions of focus in an image for each word generated by the caption
- Implemented BLEU and METEOR score calculations to measure caption accuracy in training, validation, and testing

Linguistic Truth Parser **March 2025 - May 2025**
- Coded an end-to-end boolean machine that parses spoken statements and verifies validity on test strings with a 92% accuracy, given a context-free grammar and using NLTK and Wav2Vec2 audio transcription models
- Cleansed approximately 2 hours of audio files into a dataset with uniform channel, sample rate, and file format
- Fine-tuned the facebook/wav2vec2 model to develop vector representations of audio tokens specific to parsing task
- Restricted output vocabulary to given grammar based on phonetic similarity, boosting transcription accuracy by 30%

Trigger Happy - A Multiplayer Party Game **January 2025 - Present**
- Engineered a networked multiplayer party-game in C++ alongside 9 teammates over the course of a semester
- Collaborated on design of P2P network controller and serialization structure of in-game transmitted player information
- Designed base animation node wrapper to support complex animation state transitions for characters
- Earned the Audience Choice Award out of 8 teams at the annual Game Design Initiative at Cornell showcase

SKILLS

Languages: Java; Python; C; C++; C#; Typescript;
Tools & Libraries: Pytorch; Tensorflow; Linux; VS Code; Intellij; Git; Unity; Blender
